Mandatory electronic invoicing coming into effect in 2019: here's how it will work

Reducing tax evasion, increasing simplification and obtaining more tax data in order to prepare for taxpayers annual tax returns that have been completed in advance and, therefore, are already certified by the Revenues Agency. These are the main objectives underlying the introduction of the obligation, starting from 2019, to issue electronic invoices for transactions involving the sale of goods and services rendered between resident persons B2B (business to business) and B2C (business to consumer) …
